

# ATARI

## TIME 2000- AIRBORNE AVENGER

When replacing the score display with the new discrete score display (A020704-01), the following modification must be made to the main processor board.

Add a jumper from the logic ground (pin 7 of A-2 for example) to the odd numbered pins of connector J-4. The odd numbered pins are on the bottom (circuit) side of the board and are tied together by a common buss.

SCORE. SD # 10244-01 #43, 6917-01 #30
