ISSUED BY WURLITZER SERVICE DEPT., NORTH TONAWANDA, N. Y.

February 14, 1947

TO ALL WURLITZER DISTRIBUTORS:

Gentlemen:

Due to the urgent demand for taper reamers and the scarcity of this item in your own locality, we have been able to procure and stock taper pin reamers in three sizes, available for immediate shipment.

We have sizes 0, 00 and 0000 which cover taper pins most commonly used in our equipment.

In your parts manual on the Model 1015 you will find taper pin #664 which is 00 x 3/4" in length, drill to be used preceding reaming operation would be 1/8" diameter.

#665 is 0000 x 5/8" long, drill size 42 or 3/32" diameter.

#679 is 0 x 7/8" long, drill size 29.

#680 is 0 x 3/4" long, drill size 28 or 9/64" diameter.

#786 is 0000 x 3/4" long, drill size 42 or 3/32" diameter.

#25038 is 0000 x 1/2" long, drill size 39 or 40.

These reamers are square at upper end of shank so that they may be used in a regular tap wrench or chucked in an electric drill.

In order that you may have these in stock available for your own Service Department and for resale to Music Merchants, they are priced specially as follows:

Size 0	\$1.00 each, Net
00	\$1.35 each, Net
0000	\$1.50 each, Net

Please forward your order at your earliest convenience.
